

## Instructions for Download:

### a. Open the File:

Click on the provided link to access and download the jpeg file on the Purdue website.

### b. Download the Image:

Look for a "Download" button, "Save Image" option, or a similar link associated with the image. Click on it to initiate the download.

## Virtual Background Settings in Zoom:

- In the "Settings" window, navigate to the "Virtual Background" tab on the left-hand side.
  - **Adding Images:**
  - Make sure your webcam is enabled by toggling it on.
  - You'll see a list of pre-loaded virtual background options provided by Zoom.
  - To add your own images, click the "+" icon that says "Add Image" or "Add Video."
  - A file dialog will open, allowing you to browse and select the JPEG image you want to use as a virtual background.
  - Select the desired image from your computer's file system and click "Open."
- 
- **Testing the Virtual Background:**
    - Once you've added the image, you should see it displayed as a thumbnail in the virtual background settings.

- To test the background, you can choose to "Preview" it. This will show you how the background will appear behind you during a call.
