## HONORS COLLEGE

### **SCHOLARLY AND CREATIVE PROJECT GRANTS**

### **Scholarly and Creative Project Grants**

The Honors College is pleased to announce the 2017-2018 scholarly and creative project grants program. This program has *substantial* funds to award a *significant* number of individual grants to students.

The grants are designed to support work that builds toward completion of your scholarly project, a requirement for graduation from the Honors College.

**Please take advantage of this opportunity to receive financial assistance.**

Funds of up to \$1,000 may be requested to support expenses related to developing and completing scholarly or creative projects. Students with a need that exceeds \$1000 may propose a larger amount for consideration.

To be eligible, students must be enrolled in the Honors College at the time of application and be in good standing. Students who are unsure of their Honors College standing should contact their Honors Advisor to inquire.

What is considered an eligible grant expense?

- Printing posters for presentations
- Travel to conferences
- Archives
- Laboratories
- Field research
- Purchase of equipment
- Supplies
- And more...

To apply for a scholarly or creative project grant, you will need to complete an application form, which will be available this coming fall.

Students who are awarded grants must report the results of their work. Details about the reporting requirement will be included in the award letter to successful applicants. Grant applications will be accepted on a rolling basis. Decisions on grant proposals will be made bimonthly. In some circumstances, grants may be eligible for renewal for additional funds in the spring semester. If you have questions about the grants or the application process, please contact Dr. Elizabeth Brite, Director of Engaged Learning ([britee@purdue.edu](mailto:britee@purdue.edu)) or Dr. Kristina Bross, Associate Dean for Research and Creative Endeavors ([kbross@purdue.edu](mailto:kbross@purdue.edu)).
